Hello, welcome to OpenCampus! How can I help you with courses today?

Provide me list of available courses in opencampus ?

OpenCampus offers courses related to these categories:

- Creative, Social & Sustainable
- Business & Startup
- Tech & Coding
- Degrees programs

Please tell me which category you are interested in!

I am interested in Tech

Here's a list of courses available in the 'Tech & Coding' category:

- Introduction to Web Development
- Python Programming: Beginner to Practitioner
- Introduction to Data Science & Machine Learning
- Become a Maker
- Machine Learning with TensorFlow

Would you like more detailed information about any of these courses?

I am interested in AI . Does opecampus offere any course related to AI ?

Here's a list of courses available related to AI:

- From LLMs to AI Agents
- Machine Learning Degree
- Foundational Mathematics for AI

Would you like more detailed information about any of these courses?

ok , I wanted to know about LLMs course. Could you provide more information LLMs to AI course ?

Here's more detailed information about the From LLMs to AI Agents course:

**Course Name:** From LLMs to AI Agents

**Course Description:** This new hands-on course shows you how Large Language Models can be used and combined with Tools and Patterns to build AI Agents.

**What you will learn:** LLMs, Retrieval Augmented Generation, Workflows, Agents

**Course Mentor(s):** Henrik Horst

**Course Language:** ENGLISCH

**Course Location:** KIEL + ONLINE

**ECTS Credits:** 5

**Course Information:** What you get: Ramp-up course for the new fascinating capabilities of LLMs and the emerging applications of AI Agents with LLMs as the control center. Paths Throughout the course we will build multiple different applications on different levels of difficulty. There are several tracks depending on your level of expertise: "Taster" : You take the course only to get an overview grasp of the concepts "Beginner": You do not have a lot of experience but want to build first prototypes "Intermediate": You want to level up your already existing skills and knowledge "Expert": You really want to deep dive in the materials both from practical as from a

theoretical perspective You can choose the path you want to take, so that the course is open for everybody interested in the topic. We achieve those different paths with more and more in depth learning materials and tasks for the more advanced paths. You are free to choose your path and change it during the semester About the course instructor Henrik Horst teaches Machine Learning courses at opencampus.sh since 5 years. Also he is a Generative AI course instructor at the Helmholtz Gesellschaft and the Wirtschaftsakademie Schleswig-Holstein. He works as CEO at WikiMind GmbH, an AI-Software company, and has carried out multiple AI projects there. Guest speakers There will be during the course some guest speakers invited to talk about their life as an AI engineer What you should bring Basic Programming Knowledge in Python!! A prerequisite is Python skills, if you are lacking those first take the course: Python Programming: Beginner to Practitioner Otherwise that is all for the "Taster" and "Beginner" path
